SUMMARY

Full Stack MERN Developer with 6 months of production internship experience building scalable e-commerce and Digital Cards SaaS applications at Avenstek Solutions. Delivered 20+ RESTful APIs, JWT/RBAC authentication, Razorpay integration, and responsive React/Next.js interfaces following SOLID principles and MVC architecture.

SKILLS

Frontend : React.js, Next.js, TypeScript, JavaScript (ES6+), Tailwind CSS, Zustand, HTML5, CSS3, Atomic Design

Backend : Node.js, Express.js, RESTful APIs, JWT Authentication, RBAC, Zod Validation, SOLID Principles

Database : MongoDB, Mongoose

Tools : Git, GitHub, Vercel, Postman, Netlify

INTERNSHIP

Junior Web Developer Intern — Avenstek Solutions Pvt Ltd | Dec 2025 – May 2026

- Developed and maintained a production-grade MERN e-commerce platform with 8+ management modules (category, product, blog, FAQ, promotion, brand, shipment), improving admin workflow efficiency by 40%.
- Built a Next.js storefront with SEO-friendly dynamic routing, Razorpay payment integration, and secure authentication flows including password reset and email verification.
- Architected a centralized settings module that eliminated 80% of hardcoded configurations, reducing deployment errors and improving maintainability across the codebase.
- Implemented JWT-based authentication and role-based access control (RBAC) for Super Admin, Staff Admin, and User roles, securing access across all platform modules.
- Optimized global state management using Zustand, reducing unnecessary React re-renders by 35% and improving page load performance.

PROJECTS

HealPrime — Full Stack Doctor-Patient Management Platform | Sep 2025 – Oct 2025

- Engineered a healthcare appointment platform enabling patients to search, filter, and book online/offline consultations, with doctor-side workflows for confirm, reject, and reschedule actions.
- Architected 20+ RESTful APIs with JWT authentication and RBAC across Admin, Doctor, and Patient roles; integrated Razorpay payment gateway and virtual consultation support for end-to-end booking.
- Built reusable React component library using Atomic Design pattern with TypeScript, ensuring consistent UI and maintainable frontend architecture.

Cafeteria Management System | Jun 2025 – Jul 2025

- Built a full-stack pre-order system for students and staff, eliminating manual token-based ordering and reducing peak-hour queue wait time significantly.
- Implemented cart management, online payment, and pay-at-counter workflows with complete order lifecycle tracking from placement to delivery.
- Built an admin dashboard for real-time order monitoring, menu management, and user analytics via RESTful APIs.

EDUCATION

B.E. Computer Science and Engineering — IFET College of Engineering | CGPA: 8.2 | Nov 2022 – Jun 2026

CERTIFICATIONS & ACHIEVEMENTS

Java, HackerRank

Nov '25

Winner – IFET Maxlogix'25, ranked 1st among 50+ participants

May '25
